

Policy & Procedure	Risk Management Policy
Policy Area	Risk
Version Number	05
Approving Committee	Board of Management
Date of Approval	September 2023
Date of Equality Impact Assessment	September 2023
Date of Review	September 2026
Responsible Senior Manager	Director of Finance

Policy Statement

All college policies are in a standard format and a consistent approach is taken in the production, monitoring and review process. The current official version of every policy is the one that is published on the staff intranet under the section headed Policies and Procedures. A policy becomes effective as soon as it is published on the staff intranet. If a policy is to be published in other locations then where possible it should be hyperlinked to the definitive version on the staff intranet.

Associated Policies/Procedures

Where applicable Procedures associated with observing the policy are contained within this policy document, listed below and available on the below link on the Staff Intranet. Template documents associated with this policy are also located in the Forms section of the Staff Intranet.

<https://intranet.westcollegescotland.ac.uk/reference/SitePages/Policies%20and%20Procedures.aspx>

Equality Statement

The College is committed to providing equal opportunities to ensure its students, staff, customers and visitors are treated equally regardless of gender reassignment, race, religion or belief; disability; age; marriage and civil partnerships; pregnancy and maternity; sexual orientation; sex.

Please note this document is available in other formats, to request another format please email info@wcs.ac.uk

Introduction

The Financial Memorandum with the Scottish Funding Council (SFC) requires that the governing body complies with the principles of good governance set out in the [Code of Good Governance for Scotland's Colleges](#). The Financial Memorandum also requires the governing body to ensure that:

- The College has an effective policy of risk management and risk management arrangements.
- The College Audit and Risk Committee supports the Board and Principal with regard to their responsibilities for risk, control and governance and associated assurance through a process of constructive challenge.
- Internal audit must provide the governing body and senior management of the College with an objective assessment of adequacy and effectiveness of risk management, internal control, governance, and value for money.
- The College undertakes careful appraisal of the risks before accepting any contingent liability.

The College is also required to comply with the requirements of the [Scottish Public Finance Manual](#) (SPFM). The SPFM requires that the College must *'develop a framework for assessing risks that evaluates both the likelihood of the risk being realised, and of the impact if the risk is realised. Risk assessment should be recorded in a way that clearly demonstrates the key stages of the process.'*

This Risk Management Policy has therefore been written taking account of the requirements of both the SFC Financial Memorandum and the Scottish Public Finance Manual.

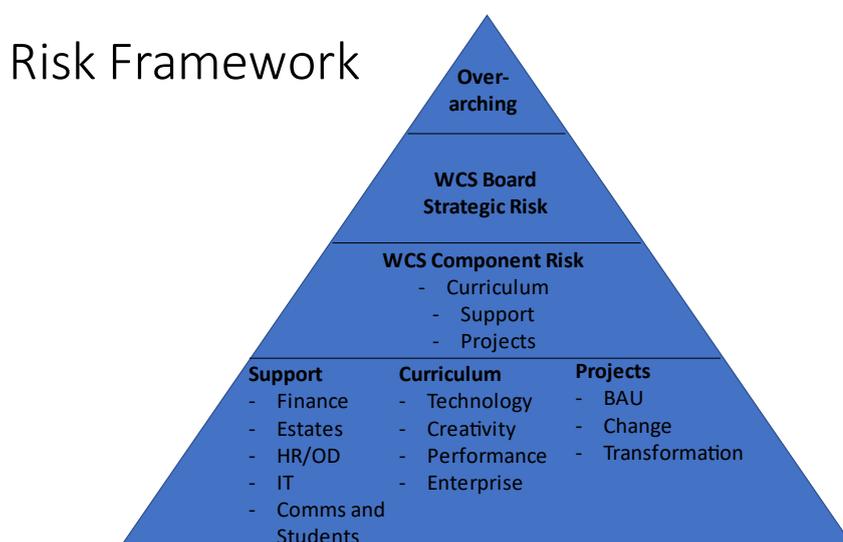

In addition to the above requirements the internal auditor must produce an Annual Report to the Board of Management on their activities during the year. The report must include an opinion on the adequacy and effectiveness of the College's risk management, internal control, and governance. This Policy therefore forms a key component in allowing the internal auditors to be able to report without qualification that the College is complying with these requirements.

The Risk Management Policy is a key document in ensuring that the four Strategic Priorities of Personalisation, Collaboration, Agile and Adaptive and Digital contained within the [College Corporate Strategy 2019-2025](#) are delivered. The Risk Management Policy aims to ensure that the College community is aware of the level of risk that the organisation is willing to accept; that some risks will always exist and will never be eliminated, however mitigation can be put in place to minimise their impacts.

The College recognises that it has a responsibility to manage risks and supports a structured and focused approach to managing them through application of the Risk Management Policy. In this way the College will better achieve its four strategic priorities and enhance the value of services it provides to the wider community.

The approach of the Risk Management Policy is that it is owned and overseen by the Board of Management, . The Risk Management Policy aims to ensure that the Strategic Risk Register will be informed by the College Operational Planning process and from all Board of Management Committees with the objective of being outward facing and strategically focused.

The College’s risk framework is illustrated below:

The College’s Risk Management Policy objectives are to:

- Integrate risk management into the operational processes and culture of the College.
- Manage risk in accordance with best practice recognising and mitigating risk to a controllable level which does not interrupt the operation of the College.
- Anticipate and respond to changing requirements through regular horizon planning.
- Prevent injury, damage, losses and reduce the cost of risk management as part of everyday operational management; and
- Raise awareness of the need for risk management by all those connected with delivering the College’s Strategic Priorities daily.

These objectives will be achieved by:

- Establishing clear roles, responsibilities, and reporting lines within the College for risk management from strategic through to operational risk.
- Providing opportunities for shared learning on risk management across the College.
- Reinforcing the importance of effective risk management as part of everyday work by offering training.
- Monitoring and reporting on strategic risk quarterly and operational risk monthly recorded through the maintenance of risk registers.
- Incorporating risk management considerations into the annual internal audit plan and any internal / external audit work conducted.
- Monitoring arrangements on an on-going basis.

The Board of Management and Senior Management Team are fully committed to the principles of risk management and the approach outlined within this Policy.

Risk Management Overview

Purpose

The purpose of the Risk Management Policy is to:

- Outline West College Scotland's approach to risk management.
- Describe the procedures for the management of risk within the College while detailing the roles and responsibilities of the key business areas.

Objectives

To ensure the effective delivery of the College Risk Management Policy, the following objectives will require to be progressed by the College Senior Management Team:

- To undertake a review every three years, or earlier as required, of the College Risk Management Policy. The review will ensure clear roles, responsibilities, and a reporting framework for the managing of risk across the College is maintained and developed.
- To develop operational planning guidance on risk identification and its translation into strategic risk as appropriate.
- To monitor and report on risk management arrangements to the Board of Management on at least a 6 monthly basis with engagement from the Audit and Risk Committee overseeing the College risk management process and adherence to the Colleges Risk Management Policy in compliance with the Scottish Public Finance Manual.
- To continue to integrate risk management into the culture of the College and to raise awareness of the need to manage risk effectively throughout the College.

- To comply with corporate governance requirements and integrate effective processes to allow the Board of Management to approve the annual Accountability Report including the section on Risk Management and Internal Controls.

Terminology

The following represents the meaning of terminology that is used throughout the Policy:

- **Risk Management:** The coordinated activities, systems, and processes in place to direct and control the College regarding the management of risk.
- **Risk:** The potential 'effect of uncertainty on objectives,' where an effect is a deviation from an intended or expected outcome. A risk will be considered as either a threat (negative) to the College's ability to achieve any given objective or as uncertainty resulting from an opportunity (positive) which offers potential benefits to the institution.
- **Issue:** A certain event which is known and will impact upon the achievement of the College's Priorities and Objectives.
- **Risk Appetite:** This refers to the level of risk the College is willing to tolerate or accept in the pursuit of its objectives. When considering threats, risk appetite defines the acceptable level of exposure deemed tolerable or justifiable by the College; when considering opportunities, risk appetite defines how much the College is prepared to actively put at risk to realise potential or expected benefits.
- **Risk Score:** The calculated level of risk which the organisation is exposed to in pursuit of its objectives.
- **Risk Owner:** this is the person, persons or entity in authority who is accountable for the effective management of a risk.

Roles and Responsibilities

To be effective, the risk process is recognised as the responsibility of the Board of Management and of all members of staff and will integrate with College operating requirements.

Owner	Role
<p><u>Board of Management</u> <i>Has a fundamental role to play in the management of risk.</i></p>	<ul style="list-style-type: none"> • Provide authority and responsibility for the establishment, maintenance, support, and evaluation of the Risk Management Policy. • Set the tone and promote a positive risk and control culture within the College. • Delegate the overall implementation of risk management and review of risk to the SMT. • Have knowledge of the significant risks facing the College.
<p><u>Audit and Risk Committee</u> <i>Has a fundamental role to play in the oversight of the College management of risk.</i></p>	<ul style="list-style-type: none"> • To ensure compliance with corporate governance requirements. • To review the process of risk management and approve for presentation to the Board. • To review internal processes and systems and work closely with internal and external auditors to obtain reports on these.
<p><u>Board Committees</u> <i>Oversee significant strategic and operational risk management and mitigation.</i></p>	<ul style="list-style-type: none"> • To review the College's strategic risks. • Ensure the mitigating actions for such risks are addressing the risk factors and work to mitigate risk is progressing in line with agreed timelines. • To provide a summary report twice a year to the Audit and Risk Committee indicating their level of comfort regarding the risk areas under their remit.
<p><u>Senior Management Team</u> <i>Support and implement policies approved by the Board of Management.</i></p>	<ul style="list-style-type: none"> • Implementation of Risk Management Policy. • Overall co-ordination of risk management. • Promotion of a comprehensive approach to risk management. • To review the probability and impact assessments of risks on a regular basis.

Owner	Role
<p><i>The Senior Management Team consists of the Principal, Vice Principals, Assistant Principals and Directors.</i></p>	<ul style="list-style-type: none"> • To ensure appropriate levels of awareness throughout the College. • Ensure risk mitigation are being managed in line with agreed plans and updates to such risks are updated quarterly for strategic risk and monthly for operational risk. • That such risk registers (Strategic and Operational) are regularly reviewed.
<p><u>College Management Team</u> <i>Encouraging and embedding good risk management practice within their area of activity.</i></p> <p><i>The College Management Team consists of all those managers who are directly line managed by SMT.</i></p>	<ul style="list-style-type: none"> • Co-ordinating and ensuring that the operational objectives are implemented in line with the Risk Management Policy. • Have an awareness and understanding of risks which fall into their area of responsibility, the impacts these may have, and monitor outcomes against the risks identified ensuring that response plans detail corrective action to minimise risk. • Ensure that operational risk for College departmental areas is recorded and managed by way of risk register and reported on monthly. • Report any new risks identified or failures of existing control measures to SMT. • Report on current 'active' risks highlighting mitigating actions and effect towards risk reduction.
<p><u>College Staff</u> <i>Encouraging and embedding good risk management practice within their area of activity.</i></p>	<ul style="list-style-type: none"> • Understand their accountability for individual risks as noted in the risk register. • Understand how they can enable continuous improvement of risk management and risk awareness. • Report systematically and promptly to a member of the College Management Team or Senior Management Team any perceived new risks or failures of existing control measures.
<p><u>Internal/External Audit</u> <i>Ensuring the effectiveness of organisational and financial control systems, including monitoring performance</i></p>	<ul style="list-style-type: none"> • To review risks and limitations of existing control measures. • To review the adequacy of internal control systems designed to minimise risk. • To make appropriate recommendations following on from any internal / external audit

Owner	Role
<i>against quality assurance standards.</i>	reports to the SMT, which will effectively improve systems of control.

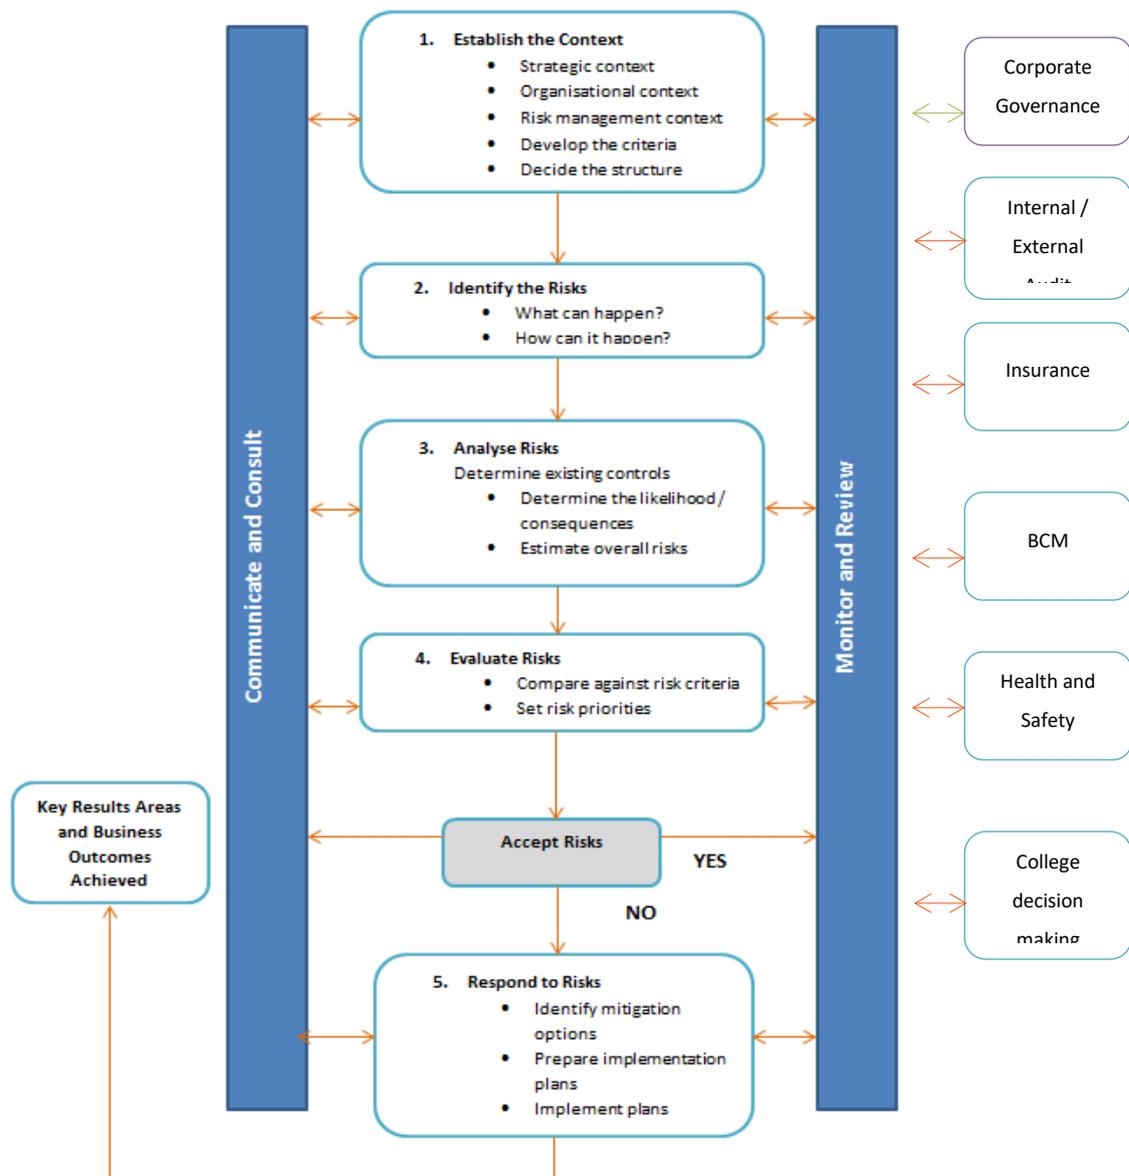

Partnership and Projects

For the College, it is important to ensure partnerships and projects are considered in a Risk Management context, as well as core services. Where the College engages in strategic projects and partnerships, it will look to develop joint risk management practices with relevant partners as required.

Risk Management Framework

The overall responsibility for ensuring the College has effective risk management framework is owned by the Board of Management being implemented and co-ordinated by the College Senior Management Team (SMT). Risk management at the College is closely aligned to the achievement of the College's objectives, corporate governance, internal/external audit, business continuity management (BCM), insurance, health and safety and occupational health and safety arrangements. These different elements act as support mechanisms for the delivery of the Risk Management Policy at the College. Internal and external audit also plays a key role in scrutinising the mitigations and controls implemented by the College.

Risk Management Framework

Code of Corporate Governance

The Board of Management is ultimately responsible for the College's system of internal control and for reviewing its effectiveness. Such a system is designed to manage rather than eliminate the risk of failure to achieve the College strategic priorities and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board of Management has delegated the day-to-day responsibility to the Principal, as Chief Executive, for maintaining an adequate system of internal control that supports the achievement of the College's policies, aims and objectives, whilst safeguarding the public funds and asset.

Internal / External Audit

Internal audit will assess the effectiveness of the College's internal controls and review risk management as part of the Corporate Governance arrangements. Internal audit will use the information on the Strategic Risk Register to inform their annual audit plan.

External audit will annually undertake an overall review of the corporate governance arrangements and processes of internal control in place at the College. Based on their audit work and the findings made by the internal auditors they will form an opinion on adequacy of the systems in place to comply with corporate governance requirements.

Insurance

Insurance is one method the College uses to transfer risk. The implementation of an effective Risk Management Policy will have an impact upon the premiums paid by the College as does external environmental factors which the College have no control over. The prevalence of insurance claims will need to be monitored as these will have a bearing on how well the College is mitigating and managing risk and therefore could impact on the Strategic and Operational Risk Registers.

Business Continuity Management (BCM)

Business continuity underpins and can mitigate key business risks - it is concerned with how the College can overcome disruption in the event of an adverse incident or situation and continue to deliver key services at an agreed, pre-determined level. It is the low probability/high impact risks that if they occurred could result in the failure of key services or systems. BCM is key part of the Colleges approach to managing risk of College operational failure.

Health and Safety

There are clear and well-established links between the health and safety and risk management. The College is committed to achieving best practice in health and safety management and is fully committed to controlling risk and preventing harm to people.

The College will use the guidance in Managing for Health and Safety at Work (MFHS), which supports the model of managing health and safety with a 'Plan, Do, Check and Act' approach. This model helps to achieve a balance between the systems and behavioural aspects of management.

The Board of Management has a primary objective to ensure health and safety is integrated into the College's core business management activities and that suitably resourced health and safety management systems are implemented which are also influenced by risk management arrangements.

Risk Implications – Decision Making Process

Effective risk management is crucial to the achievement of the College's Strategic Priorities and the success of the strategic operation and provision of College services. It is important to recognise that there are risks associated with decisions taken in respect of the delivery of College business.

The nature, impact and probability of these risks will vary depending on a wide range of circumstances or potential outcomes.

Risk Management Process and Approach

Risk management is a cyclical process – new risks emerging while old risks become obsolete – and is based upon the following basic workflow:

- a) Identification of Risks
- b) Risk Assessment and Evaluation
- c) Plan Mitigations
- d) Monitor and Control

The following sections explain in detail what each of the above steps require the College to undertake.

Identification of Risks

The first step in the risk management process is risk identification. The process of risk identification will vary depending on context and the level at which risks are being assessed. For example, at organisational level, strategic risks should correlate with the key college objectives linked to the College Strategic Plan 2019-2025 and should therefore be identified as part of the College cyclical planning process. Similarly, at departmental level, risks should align with the key objectives set out in Operational Plans and should therefore be identified early as part of the planning process. Within a project setting, key risks should be identified at the start of the project lifecycle, during the project initiation/planning phase and mitigated as part of project activity.

A variety of methods can be used for identifying risks. For example, sessions or workshops involving key stakeholders are common approaches however risk of failing to achieve an operational or strategic objective is the approach adopted to identify key risks. At project level, risk identification may be conducted using standardised checklists which identify risks commonly associated with achievement of project activities, or by benchmarking against similar projects undertaken in the past.

The risk management process is cyclical and therefore risk identification is not a one-off exercise; it is a continuous process which is necessary to identify new risks that had not previously arisen, but which might affect the College's ability to achieve its objectives in the area under consideration. Regular review, particularly of Operational risk is therefore necessary. Strategic risk changes less frequently however it is necessary to review and keep well managed on a quarterly basis.

Recording the Identified Risks

All identified risks will be recorded in the Strategic Risk Register using a standardised risk register template. Within the Strategic Risk Register there are several fields to populate.

Each risk should have:

- a) **Risk Number and Name:** A title which should be concise but contain enough information to distinguish it from the others.
- b) **Risk Description:** The description should contain information on the three composite parts of a risk; the cause, the risk event, and the impact on the College Strategic Priorities.

'As a result of <cause/statement of fact>, there is a risk that <uncertain event> may occur, which would result in <an effect on Strategic Priorities>.

- c) **Risk Owned and Managed By:** A member of the Senior Management Team that has been given the responsibility and authority to manage a risk/set of risks and is

accountable for doing so. The risk owner could be the Principal or Vice Principal – particularly in the management of Strategic Risk.

- d) **Risk Scoring:** Risk scoring will be undertaken in the first instance to prioritise risks using a standard 5 by 5 semi-quantitative scale (shown in 4.8 below) for risk probability and impact.
- e) **Risk Mitigation:** Actions taken to reduce the probability and impact of the risk occurring.

This use of a standard scoring threshold promotes consistency in risk assessment.

Risk Scoring Thresholds

Probability	Score	Impact	Score
Very Likely	5	Severe	5
Likely	4	Significant	4
Possible	3	Moderate	3
Unlikely	2	Minor	2
Very Unlikely	1	Negligible	1

When assessing impact, it is important that a holistic analysis of the categories of risk be considered, in terms of how the issue would impact on the College (a partnership, a service or a specific project). The agreed approach to the assessment of risk at the College is undertaken based on existing control measures.

When assessing probability, a consideration of historical information, external drivers, trends, and statistics can be useful in determining an appropriate level.

Each risk should be allocated two risk scores, as follows:

- Current Risk Score
- Target Risk Score

The Current Risk Score is populated and refers to the level of risk an activity would pose if no controls or mitigating actions were in place.

The Target Risk Score refers to the level of risk remaining after controls and mitigating actions are considered and should ideally reflect the applicable risk appetite.

Risks identified within the Strategic and Operational Risk Register will be plotted on a probability impact grid, as shown in the table below, to provide a pictorial representation of risk exposure. Risks which fall into the upper boundary (Red RAG status) will be considered as critical for management attention and as greater than the acceptable risk appetite. Efforts will be made to reduce risk exposure below the upper boundary.

Probability		Result				
Very likely	5	5	10	15	20	25
Likely	4	4	8	12	16	20
Possible	3	3	6	9	12	15
Unlikely	2	2	4	6	8	10
Very unlikely	1	1	2	3	4	5
		1	2	3	4	5
Impact		Negligible	Minor	Moderate	Significant	Severe

The following table should be used to define the impact score. It is likely that the movement in several factors, be it cost or scope, will be utilised to arrive at a final score.

Negligible	Minor	Moderate	Significant	Severe
Insignificant change in cost	< 10% increase	10 - 20% increase	20 - 40% increase	> 40% increase
Insignificant change in schedule	< 5% increase	5 - 10% increase	10 - 20% increase	> 20% increase
Barely noticeable scope decrease	Minor areas affected	Major areas affected	Unacceptable reduction	Project end item effectively useless
Barely noticeable quality degradation	Only demanding applications effected	Quality reduction requires sponsor approval	Unacceptable quality reduction	Project end item effectively useless

In accordance with the table below, risks with an overall risk score of 15 or above will be elevated for attention to the Board. Where appropriate for these elevated risks, a risk response plan will be developed which will seek to reduce the potential impact of the identified risk. There may be certain other strategic risks, such as IT risks, which will require the development of a risk response plan despite having an overall risk score below the elevated level. Whether a risk response plan is required will be considered by the Audit and Risk Committee.

Risk level	Score	Description
High	20 - 25	Unacceptable level of risk exposure that requires a review of controls and immediate mitigating action
High-Medium	15 - 19	
Medium	11 - 14	Acceptable level of risk exposure subject to regular monitoring
Low-Medium	6 - 10	
Low	1 - 5	Acceptable level of risk exposure subject to periodic monitoring

The risk category is linked to the risk appetite that the College is willing to be exposed to and the methodology for arriving at the risk appetite is explained below.

The information collected and recorded within the Strategic Risk Register to this point should enable initial assessment and scoring of the risk.

Risk Assessment and Evaluation

Risk assessment and evaluation takes account of various key components.

Risk Appetite

The next step in the risk management cycle is to establish the risk appetite level that the Board of Management is willing to accept in pursuit of its Strategic Priorities.

The College accepts that it must take risks, to some extent, to achieve its Priorities and to realise expected benefits. The College is committed to ensuring that all risks taken will be proactively controlled and exposure will be kept to an acceptable level. The College acknowledges that the level of exposure carried by different activities will vary and its threshold for accepting varying levels of risk will change depending on the risk area under

consideration, the specific objectives involved, the subsequent activities undertaken and the projected benefits.

However, the College is clear that it will reject or proactively manage any activity that has the potential to cause significant financial or reputation harm to the institution, most notably where these might endanger the College’s ongoing viability, its ability to achieve its key strategic priorities or its ability to meet its regulatory and/or legal obligations.

The College defines Risk Appetite based on the following categories:

1	<u>Classification</u>	2	<u>Description</u>
	AVERSE		Avoidance of risk and uncertainty is a key organisational objective.
	MINIMALIST		Preference for ultra-safe business delivery options that have a low degree of inherent risk and only have a potential for limited reward.
	CAUTIOUS		Preference for safe delivery options that have a low degree of residual risk and may only have limited potential for reward.
	OPEN		Willing to consider all potential delivery options and choose the one that is most likely to result in successful delivery while also providing an acceptable level of reward (and value for money etc.)
	HUNGRY		Eager to be innovative and to choose options offering potentially higher business rewards, despite greater inherent risk.

Based on these categories, the College’s institutional baseline Risk Appetite is defined as ‘cautious to open’. This means that, while maintaining a level of prudence, the College is generally willing to consider all options and will accept moderate levels of risk in the pursuit of its Priorities, albeit with a preference for options or activities that limit exposure, even if the rewards are likely to be similarly limited.

A full definition of the College risk appetite for each category of risk can be found at Appendix 2.

While a general appetite of cautious to open is in place, it is recognised that risk appetite will vary according to the Priorities pursued and the linked activities undertaken. For example, the College would consider options or activities which carry elevated levels of risk, where it can be shown that the anticipated outcomes are realistically achievable, and likely to deliver enhanced benefits; acceptance of risk, irrespective of risk appetite, should always take account of the likely benefits an activity will deliver.

At a strategic level, risk appetite is applied to the College’s identified risk areas as follows:

	<u>Averse</u>	<u>Minimalist</u>	<u>Cautious</u>	<u>Open</u>	<u>Hungry</u>
Finance					
Political					
Governance					
Competitive Environment					
Staffing and HR					
Student					
Reputational / External					
Infrastructure					
Learning and Teaching					
Digital Infrastructure / Security					
Digital Delivery					

It should also be noted that risk appetite will likely vary according to context; for example, capital projects provide a different context and should be considered on individual merit, as projects are usually stand-alone, and fall out with the ‘business as usual’ activities of the College. Consequently, the College may be prepared to accept higher levels of risk for a project that will feasibly deliver transformative change or bring significant rewards.

Plan Mitigations

When considering the appropriate risk response, the controls already in place should be recorded under Controls in the Strategic Risk Register and potential mitigating actions should be identified, where applicable (i.e., where a risk requires treatment).

Mitigations actions should change or reduce either the probability of a risk materialising, or its impact if it does (or both) and they should also be recorded in the Strategic Risk Register assigned a responsible person/lead and set a target date for completion.

Taking account of the mitigations the Current Risk Score should be re-assessed and revised, and a Target Risk Score agreed. The Target Risk Score should not be higher than the Current Risk Score (either in terms of impact, or probability, or both), because again, it refers to the level of risk remaining after controls and mitigating actions are considered.

After mitigations and risk scores have been identified, the planning process is effectively complete, and the agreed plans should be taken forward for implementation.

Control strategies / plans may align with the categories below:

Risk Mitigation Measures

Risk Response	Commentary
<p>Tolerating or Accepting the Risk:</p>	<p>It is rarely possible or economically desirable to remove all risks entirely, all risks can be accepted at some level. In addition, there are some risks over which the College has little or no control and some for which any management actions would be prohibitive in terms of resource; yet for valid reasons the College will continue with the activity. The important point is that these risks are identified, clearly understood, and monitored. This option is frequently accompanied by a contingency plan for dealing with the impact that will arise if the risk is realised.</p>
<p>Transferring or Sharing the Risk:</p>	<p>Some risks can be transferred to another body or organisation, for example insurance, contractual arrangements, outsourcing and partnerships. Realistically, transferring all a risk is extremely difficult to achieve effectively and is often confused with action ownership (where the risk is owned by entity A (who feels the pain if the risk comes about) but action to mitigate or control the risk lies with entity B. If the risk is Transferred, then care needs to be taken that the risk is transferred. However, some risks (for example reputation) cannot be transferred. It is important that how (to whom) the risk has been transferred and what element of risk is reduced as a result.</p>
<p>Terminating or Avoiding the Risk:</p>	<p>Although unusual, it may be that a particular risk cannot be adequately controlled or transferred and the consequence or likelihood of such a risk being realised is such that it cannot be accepted. In this case the only course of action may be to eliminate the risk by ending all or part of a particular activity. In some instances, this may involve temporary suspension of an activity until the likelihood and/or impact of the risk has reduced for external reasons.</p>
<p>Treating or Controlling the Risk:</p>	<p>It is usually possible to control a risk to an acceptable level and this is achieved by building control mechanisms into operational activities. Whichever Policy is adopted it is important that the controls are proportionate and cost effective. Where the decision is taken to mitigate a risk by</p>

Risk Response	Commentary
	introducing control measures it is also important that the operation is not impeded by over controlling to eliminate a threat risk or realise an opportunity.

Risk Cycle - Monitor and Control

The College operates an annual risk cycle, requiring departments to consider and develop their risks at least twice a year; please note this is a minimum requirement and more frequent formal discussion of risks within appropriate operating structures is encouraged:

- Cycle 1 (by end of January): Complete a full review of all risks and opportunities, updating departmental risk registers at the end of the annual planning round, considering existing new and emerging risks to strategic and operational objectives, and reviewing and updating the risks, their controls, ownership and review dates.
- Cycle 2 (by end of July): Complete a review of significant risks (with a risk score >15) and consider and include any new and/or emerging risks. Risks should be updated if they have changed, and controls reviewed and updated as necessary.

Department need to include significant risks which apply to the College, where applicable, for consideration in the College strategic risk process.

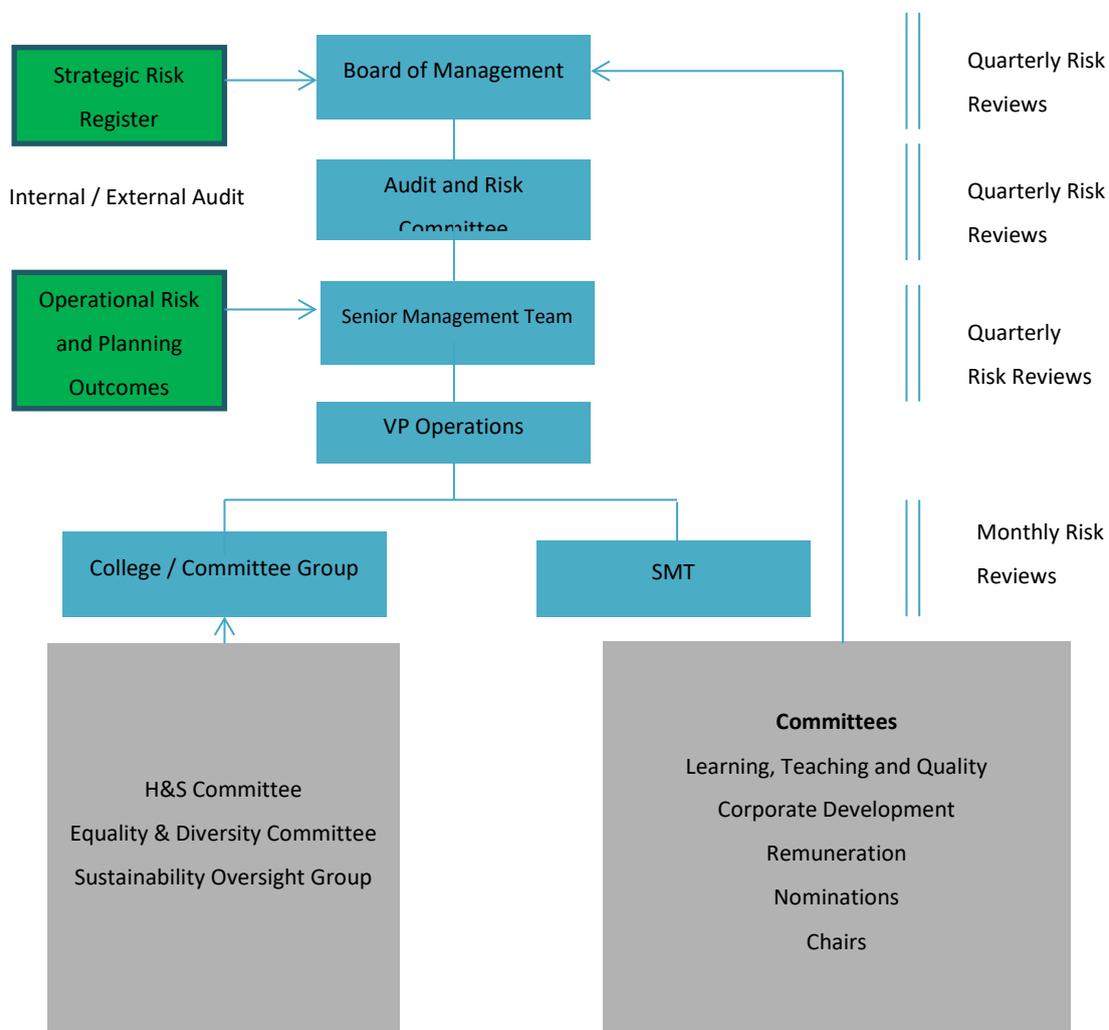

Risks may be escalated outside of this cycle to the Senior Management Team where the departmental Head considers that College level attention is warranted.

The College risks represent significant strategic and operational risks to the overall organisational objectives. College risks will be updated and formally reviewed annually at the Board of Management with sign off at Board by July each year. An interim review of College risks will also be completed by Committees / Board at the half year and full year points to check on the trajectory of the risks and consider new themes – a summary of their deliberations will be submitted to the Board of Management.

The College will use risk data from several sources to inform the College risks, including information from the College wide risk cycle, from the risk owners, available quantitative or qualitative data available relating to specific risks and information from external sources and benchmarking. Management of College risks is a shared responsibility and will require support from all staff to implement an effective control environment.

Horizon Scanning: Horizon scanning risks will be considered in line with the risk cycle and updated formally during the annual College Risk review process.

It is the responsibility of the SMT to highlight risks within their Directorates that are considered to have strategic significance. The College reporting framework is outlined below:

Measuring the Effectiveness of the Risk Management Process

Internal Audit

As indicated, the Audit and Risk Committee must be satisfied as to the College's risk management arrangements are being carried out effectively. Supporting Committees hold responsibility for ensuring the adequacy of risk mitigation. The overall College risk management framework (of which this document is part) is also subject to review by the College's internal auditors both formally through the internal audit process and through the auditor's reliance on the College Strategic Risk Register in formulating Audit Needs Assessment. The College's external auditor also take account of the College Strategic Risk Register in planning their work.

Review of Procedures

This Policy will be reviewed at every three years and presented to the Board of Management for approval after consideration by the Audit and Risk Committee.

Appendix 1: Categories of Risk

Category	Description of Risk
1) Political	Those affecting the College Strategic Priorities normally at a national political level.
2) Competitive Environment	Those affecting the competitiveness of the College to deliver its services in terms of cost, quality, ability to deliver best value and to attract customers / partners to the College.
3) Finance	Those related to financial planning and control and the adequacy of insurance cover.
4) Staffing and HR	Those affecting the recruitment, retention, and morale of staff.
5) Students	Those affecting the recruitment, retention, attainment, and morale of students.
6) Reputational / External	Those affecting the reputation of the College and/or external partnerships / projects / community in which the College is involved.
7) Digital	Those affecting the ability of the College to deliver the objectives set out in its Digital Strategy.
8) Infrastructure	Those affecting the College's physical assets including buildings and IT systems.
9) Learning and Teaching	Those affecting the successful delivery of the College's curriculum including student experience, performance, and associated ROA targets.
10) Governance	Those that impose requirements on the College which could affect priorities / funding / reputation.

Appendix 2: Risk Appetite Statement

The College's approach is to minimise its exposure to Finance, Political and Governance risks, whilst accepting and encouraging an increased degree of risk in pursuit of its mission and objectives. It recognises that its appetite for risk varies according to the activity undertaken, and that its acceptance of risk is subject always to ensuring that potential benefits and risks are fully understood before developments are authorised, and that sensible measures to mitigate risk are established.

The College's appetite for risk across its activities is provided in the following statements:

(1) Political

The College aims to make a significant, sustainable, and socially responsible contribution to the West of Scotland and to Scotland through education, knowledge exchange and operational activities. It recognises that this should involve a cautious approach to political risk and is comfortable in accepting this risk subject always to ensuring that potential benefits and risks are fully understood before developments are authorised and that sensible measures to mitigate risk are established.

(2) Competitive Environment

The College wishes to be amongst the leaders in transforming knowledge, ideas, skills and expertise into teaching, innovation, and enterprise, thereby enriching our stakeholders and wider society. It recognises that developing this may involve an increased degree of risk and is comfortable in accepting this risk subject always to ensuring that potential benefits and risks are fully understood before developments are authorised and that sensible measures to mitigate risk are established.

(3) Finance

The College aims to maintain its long-term financial viability and its overall financial strength. Whilst targets for financial achievement will be challenging the College has a minimalist appetite for risk that puts in peril the long-term sustainability of the College.

(4) Staffing and HR

The College aims to value, support, develop and use the full potential of our staff to make the College a stimulating and safe place to work. It places importance on a culture of equality and diversity, dignity and respect, collegiality, annual reviews, the development of staff, and the health and safety of staff, students and visitors. It recognises that in fulfilling the potential of the College staff, this may involve an increased degree of risk and is comfortable in accepting this risk subject always to ensuring that potential benefits and risks are fully understood before any deviation from its standards in these areas are authorised and that sensible measures to mitigate risk are established.

(5) Student

The College aims to ensure that we recruit the correct student onto the correct course, retain those students and ensure that they have a productive time at College. It recognises that in order to compete with other institutions that it must accept an increased degree of risk in order to attract and retain those students. It is comfortable in accepting this risk subject to a) limitations imposed by ethical considerations, and b) ensuring that potential benefits and risks are fully understood before developments are authorised and that sensible measures to mitigate risk are established.

(6) Reputational / External

It is regarded as critical that the College preserves its high reputation whilst at the same time it is open to exploring new / innovative external partnerships. The College has an open appetite for risk in the conduct of any of its activities that puts its reputation in jeopardy, could lead to undue adverse publicity, or could lead to loss of confidence by the political establishment and funders of its activities.

(7) Digital

The College wishes to be at the leading edge in the digital arena and wishes to grow its digital ambitions. It recognises that that this will involve an increased degree of risk in developing digital solutions and is comfortable in accepting this risk subject to a) limitations imposed by financial considerations, and b) ensuring that potential benefits and risks are fully understood before developments are authorised and that sensible measures to mitigate risk are established.

(8) Infrastructure (including estate projects, IT, and equipment)

Major change activities are required periodically to develop the College, and to adapt to changes in the regulatory and technological environment and in the nature and conduct of the College's activities. The College expects such changes to be managed according to best practice in project and change management but given the operating environment in which it operates has open appetite for investment in this area where the benefits can be shown to outweigh the costs.

(9) Learning and Teaching

The College wishes to stimulate students to develop a wish to engage in lifelong learning, encourage an independent attitude and an aspiration to achieve success. It recognises that this should involve an increased degree of risk in developing education and the student experience and is comfortable in accepting this risk subject always to ensuring that potential benefits and risks are fully understood before developments are authorised and that sensible measures to mitigate risk are established.

(10) Governance

The College places great importance on governance, and has no appetite for any breaches in statute, regulation, professional standards, bribery, or fraud. It wishes to maintain accreditations related to courses or standards of operation and has cautious appetite for risk relating to actions that may put accreditations in jeopardy.

The above statements take priority over the statements of areas of risk appetite below.

Equality Impact Assessment

Name of policy/procedure/decision:

Risk Management Policy

Responsible Person: Director of Finance **Date:** September 2023

- 1. What information is readily available to measure the effect this policy / procedure / decision has on people who share protected characteristics? What data is not available or not reliable?**

The Policy sets out the expectations of the Board of Management on how the College will manage risk. It has been compiled following consultation with the Senior Management Team and Board of Management. Through this process the impact on people who share protected characteristics as noted below has been considered. The Policy will be subject to ongoing review. There has been no limitations on information reviewed nor is any information contained to be unreliable.

- 2. What does this information indicate about positive, neutral and negative impacts on people who share protected characteristics? Please detail below.**

Protected Characteristic	Description of Impact
Age	From the information available the Policy will not treat people from protected groups less favorably.
Disability	As above
Sex	As above
Gender Re-assignment	As above
Sexual Orientation	As above
Race	As above
Religion or belief	As above
Pregnancy Maternity	As above

3. **What arrangements could be implemented to reduce or mitigate any potential adverse or negative impacts identified above?**

No further arrangements considered to be necessary to reduce or mitigate any potential adverse or negative impacts as none were identified above.

4. **Has there been consultation/is consultation planned with stakeholders/ learners/ staff who will be affected by this policy/project/decision? Please detail below how this has affected your decision making.**

The operational aspects have specifically sought input from the staff charged with its implementation. The Policy is subject to regular review by both Senior Management and the Audit and Risk Committee. Any feedback will be incorporated into future updates.

5. **How will the policy/project/decision be monitored and evaluated?**

The implementation of the Policy will be evaluated by the Audit and Risk Committee as part of their annual review of compliance.
